## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Whaley et al.

There is disclosed in Whaley a filter assembly for a filtering fryer system having a tank 30 for containing hot oil, the filter assembly comprising: at least one filter having an upper filter screen 40; a filter wall 64 extending around the upper filter screen, the filter wall defining an enclosed area above the upper filter screen; and at least one drainage passageway (perforated opening) proximate a lower edge of the filter wall.

### ***Allowable Subject Matter***

Claims 9-21 are allowed.

Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

In the allowable subject matter the prior art fails to disclose or render obvious a filter wall extending upwardly from a plurality of channeled members.

### ***Conclusion***

Art Unit: 1761

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Wagner and Bivens are cited for their disclosure of the state of the art.
